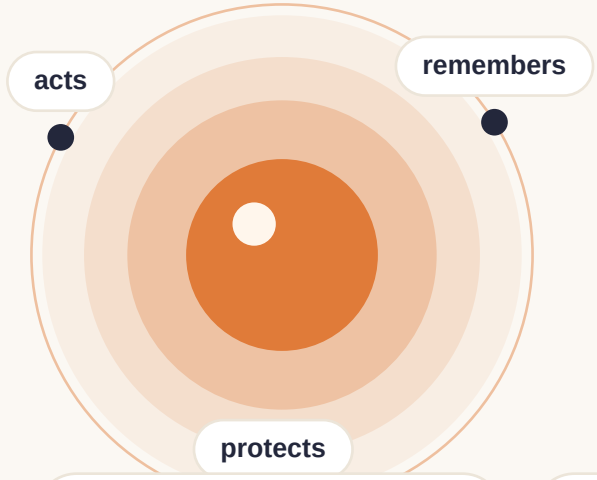
EV • A PERSONAL AI COMPANION

# Meet Ev.

A companion that actually knows you.



One owner: you

Voice + vision + memory

Private by default

LIVE TODAY • CLI • WEB • MAC • iPHONE + WATCH

19 PARTS OF LIFE, ONE MEMORY

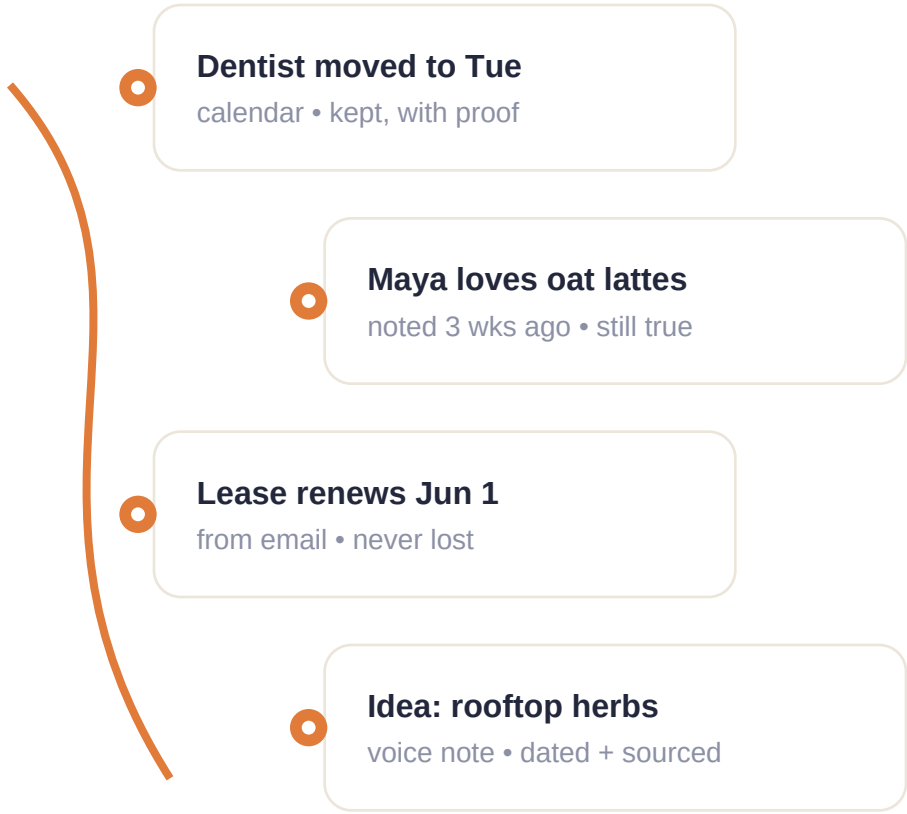
*Ev remembers. You live.*

THE HUMAN PROBLEM

# Life moves fast. Memory can’t keep up.

- **Appointments slip. Receipts vanish. Great ideas fade by Friday.**
  Every week, ordinary life leaks through the cracks.
- **Today’s assistants forget everything the moment you close them.**
  You repeat yourself. They start over. Nothing sticks.
- **And the helpful ones read everything — your mail, your files, your life.**
  Convenience today costs privacy forever.

**Ev is the opposite:**
dated, sourced memories • secrets never reach the AI • honest offline mode
*It shows its work — or says it doesn’t know.*



A NORMAL TUESDAY WITH EV

# Proof from everyday life.

on your machines • works offline

Not a demo. Just Tuesday — three small moments Ev handles on its own.

## It codes.

Overnight fix, explained plainly.

**Ev**

**Fixed: login crash 2:14 AM**

Tests pass • ready to review

*rule from Mar 3 • you approved once*

Done • while you slept

## It orders.

The usual, before you run out.

**Ev**

**Oat milk price dropped 18%**

Arrives Thu • under budget

*asked first • receipt kept*

Done • while you slept

## Your second half.

Mornings that run themselves.

**Ev**

**30-sec brief: 3 things today**

Leave 8:40 • rain at 9

*hands-free • filed away*

Done • while you slept

- Asks before acting
- Shows its work
- Says when unsure

*Permissioned voice, vision, and live data — you stay in charge.*

SIMPLE MATH THAT SCALES

# $19 a month. Built to last.

One flat subscription. No ads. No selling your data. Ever.

EV PERSONAL • SUBSCRIPTION

**$19** / month

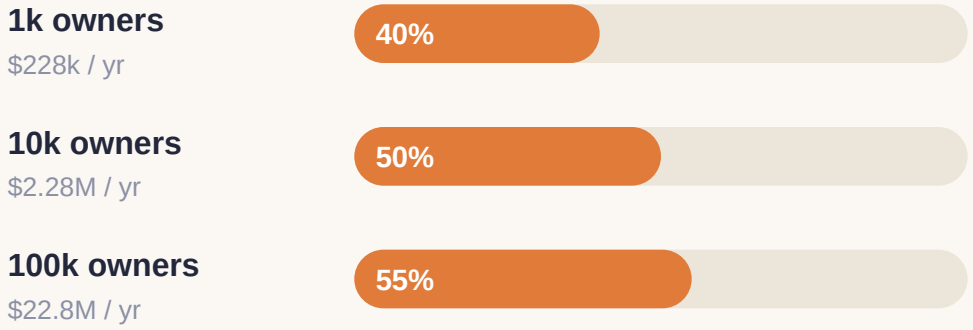
- Everything included
- Cancel anytime
- Your data stays yours

Rivals charge $20+ a month for less.

*$228 a year — less than one lost day.*

## Profit grows as Ev grows

Everyday work runs free on your device; the hosted brain is capped.



**Why the 40–55% margin holds:**

- Local-first — everyday work costs us ~$0
- One memory — no rework, no re-asking.
- Private — no ad machinery to feed.

WHY NOW

**337 copycats made $120M**

and break when you need them.

NO REAL COMPETITOR — POINT TOOLS EXIST. NO SECOND HALF EXISTS.

# Own your mind.

Big Tech rents your data back to you, and most people don’t trust it. Ev is different: one owner, nineteen parts of life covered, running on your own machines — and it is working software today, not slides.

- live: phone • web • Mac • watch
- 20/20 safety checks green
- works with no internet

THE ASK

## Back Ev to the first 10,000 owners.

App polish • safety & privacy checks • guides + support • backup & sync

Grants first (~$275K), then ~$1.25–2M to scale past 10k.

*Every dollar makes Ev kinder, safer, and more yours.*

We show what is still growing — honesty is the product.

## Your mind, with backup.

$19/mo subscription • private by default • Ev remembers. You live.
